FACULTY OF INFORMATION AND COMMUNICATION TECHNOLOGY
SEMESTER 1 SESSION 2023/2024

BITP 1113 Programming Technique
Final Project

Group Project

Last Date Submit: 18th January 2024

QUESTION (20 MARKS)

Write a program to solve problem given below.

Requirement:

1. Apply array and function concept in developing your C++ programming.
2. The program must be flexible to accept any 7 subjects.
3. The program must be able to calculate the average value for all the given scores of all 7 subjects.

In this semester, students are enroll in 7 subjects. Based on information given in Figure 1, you are required to:

1. Insert all the information given.
2. Get the total score of 7 subjects.
3. Calculate the GPA = Total Score/7 subjects
4. Identify the grade scheme where:
 - a. 90.00 to 100.00 is 1st class
 - b. 75.00 to 89.99 is 2nd class upper
 - c. 50.00 to 74.99 is 2nd class lower
 - d. 40.00 to 49.99 is passed
 - e. Below 40.00 fail

Student name: Abu
Subject Code : DITS1113
Mark for DITS1113: 85
Subject Code : DITP1113
Mark for DITS1113: 68
Subject Code : DITM1113
Mark for DITS1113: 80
Subject Code : DITI1113
Mark for DITS1113: 55
Subject Code : DITP1123
Mark for DITS1113: 74
Subject Code : DITZ1113
Mark for DITS1113: 75
Subject Code : DITW1113
Mark for DITS1113: 47

Total Score: 484
Average Score: 484/7
Status: 69.14
Result: 2nd Class lower
